

Instant Shade Umbrellas & Marquees Artwork Specifications

File Formats

Send us your logo in an EPS, AI or PDF format. We can't use JPG files as we need to increase the size of the logo and this doesn't work with JPG.

Colours

Please specify the Pantone (PMS) colour codes for any colour you want to have printed. If you do not have the code we will pick a PMS colour for you*

Fonts

Please make sure all fonts are **outlined**, this ensures they appear correctly. If you don't have the font please supply the name of the font.

Images

To print photographs the resolution needs to be at least 75dpi at 100%, the higher the better! We use DropBox if a file is too large to email.

Once we have received all your artwork, we will create a layout for you to approve.
If you would like to create your own layout you must use our template**

Where can I find an EPS, AI or PDF version of my logo?

Have you had business cards or t-shirts printed with your company logo? Chances are they would have your logo in the correct format, simply ask if they could send you the file or talk to us about our redraw service.

*If you can't supply us Pantone (PMS) colours we will choose the colour and note the colour on the layout but we cannot guarantee the colour match.
**We cannot accept responsibility if any printing errors occur if you have supplied us a layout.
